

Back Order Prediction

Wireframe Documents

Table Of Content

- 1. Home Page**
- 2. Prediction Page**

Home Page

Homepage will consist of single page, which consist of different user inputs and the single button that will either lead user to predictions page or error page. We have created the design of a Back Order Prediction application in a such way that user can insert their inputs according to their requirements in a flexible manner on a home page.

Project: Back Order Classification
Using Machine Learning, Python, Flask And Cassandra

Machine Learning App with Flask

Enter Your Details

Enter Sales Quantity For The Prior 1 Month Time Period
